Class VI Mathematics Homework

Practice work for reinforcing concepts covered in class.

Instructions

Complete all questions neatly in the mathematics notebook. Show each calculation step and submit the work to the subject teacher.

Assignment

1. Write the first ten multiples of 6 and 8. 2. Find the HCF of 24 and 36. 3. Solve: 245×18 and $936 \div 12$. 4. Draw and label an acute, right and obtuse angle.

Submission

Submit during the next Mathematics period. Parents may sign the completed page after review.

Sample document for website demonstration and testing.
